These headers can also be removed if mistakes are made or something just needs to be changed. When we get to its properties, there are plenty of things that can be changed or modified. Page size, in this case, is not given as measurements which can be selected or introduced, they are given as examples of page styles. Here we have Letter, Legal, Ledger, A3, A4, A5 and the list goes on. For the orientation of the page, there are only two options: Portrait and Landscape and regarding the Font, its Type and Size can also be changed. After these steps are completed, the output directory needs to be set. Basically, this is where the result sets (tables) are returned and automatically transformed into PDF Tables.
