What's New In AutoCAD?

Orient each imported drawing to the exact same angle, and align imported objects so they fit within the orientation and scale of your drawings. (video: 1:42 min.) A preview window is now available to preview drawing updates you've made using Markup Import. Select a drawing to update and see the result immediately. (video: 2:09 min.) Markup Assist now provides more tools to save time. Support for AutoCAD Design object types is improved. Support for SLDs has been added. You can now change a file's name during the Import process. The benefits of Markup Import now include more flexible pattern formats, including the ability to create custom objects with Pattern Import. AutoCAD now supports the DGS (Design Graphics Standards) Standardization and Assessment Model for Chapter 4 (the 'Assessing Graphics Standards') and the DGS (Design Graphics Standards) Standardization and Assessment Model for Chapter 9 (the 'Assessing Computer Graphics Standards'). With Markup Import, you can now import a drawing with a master drawing. AutoCAD now supports reference drawings containing multiple sheets. Drawings with multiple sheets are now imported as a collection of components that can be aligned and scaled as a single drawing. You can now make a continuous copy of a drawing. The ability to create a copy of an existing drawing. Previously, copying a drawing was not supported. AutoCAD 2018 What's new in AutoCAD 2018 Markup Export: Update files in two ways. With Markup Export, you can update all aspects of a drawing, including text styles, captions, logos, colors, and titles, in a single operation. (video: 1:45 min.) Export the markup for a drawing in two formats. Use Markup Export to get an AVI or MP4 file that can be opened in video editing software or share through the cloud. (video: 1:37 min.) With Markup Export, you can now export a drawing that's still open and have the updated drawing open when it's complete. You can now update a drawing without saving. Use Markup Export to synchronize a file with a master, a previously saved file, or a drawing from a previous version. Create a separate text label for each component and for each piece of text.
