## Microsoft Activation Script 1.0

[Download](#)

August 30, 2021 - Microsoft Activation Script t is available as a free download from our Software Library. This is a cmd script that activates Windows and Office. We've updated it to be compatible with Windows 10, so it should now work on Windows 8.1 as well. All you have to do is launch it and it will automatically activate the selected products. With this script, you can run any combination of Microsoft products with all updates installed. An Internet connection is not required to activate products.

We recommend that you copy this script to a USB stick so that you always have it at hand.
