Keymacro for Windows is a freeware, that allows you to manage the keyboard easily. Keymacro allows you to activate macros of shortcuts in a text editor, play a predefined message at the specified hot-key, play any sound file, record a user-defined audio file, or show a picture on the desktop, along with the release of a keystroke. The tool supports text files (simply enter the name of each macro and optionally its content), creates and saves any kind of files with.mkv extension (simply choose one of the supported formats, that is compatible with the tool), and many more. It also supports several keyboard shortcuts (default settings included), by means of which you can easily activate macros. Furthermore, you can control the recording of a macro by means of the hot-key, simply hit the hot-key and wait for the file to be created. Of course, you can also record a user-defined audio file and have the

tool launch it. Moreover, Keymacro for Windows can be freely installed and uninstalled, you do not need to worry about a recovery process. After installation, you can load your macro with the following steps: 1) Run Keymacro for Windows and then click on the "Open Keyboard" tab. 2) Press the "File" button, select the folder where you have saved the file of the macro (you can also type the exact file name, if you have no file extension, e.g. "sublime_text_plugins") and press the "Open" button. 3) The content of the macro will be shown in the text editor. Keymacro for Windows comes in two versions, we tested the full version, which is compatible with Windows 10.
