Winner of a Golden Joystick award, the award for the Best Video Game Strategy, Traffic Giant comes from two lengths of the disc: A five-chapter game and three mini-games that can be played at anytime throughout the rest of the game. The five-chapter game has players take control of nine trucks from across the world and give them a fair shot to win... Shoot 'em up, action, action, fight, battle, and lots and lots of bullets! Grab your iron sights and your sword, and get ready to face down the invaders! Leaping over the countryside in your Dragoon jet-powered tank, blast your way through hordes of aggressive enemies all intent on crashing into your big, beautiful country. You can't build bridges to cross your enemies, and you sure as heck can't turn back to defend yourself! Your gun is the only weapon you've got, and it's time to find out just how tough you can be! GAME FEATURES: • 3D environment that is easy to get into • Upgrade your weaponry throughout the game • 6 enemy types to take down! • 9 different environments to experience • Bosses to take down • 3 Game Modes Meet the little kobold king, Kubulus, and his army of doll-like creatures as they roam the land. As the King of the Kobolds, you must lead Kubulus' Kobold army on a quest to secure the lands and save the world. Being an action game, all moves are made via the analog stick with a limited number of attacks from your four martial arts weapons: a wooden bat, a rope, a rolling pin, and a spiked club. The vehicles can be used to traverse the world map, and you must find a way to get from one area to the next, as the environment can often be quite hostile. Kobold King is a fast-paced action/platformer that is easy to pick up and play, but also challenging enough to keep you coming back for more! KEY FEATURES: • Classic action game with a Kobold theme • Kobold King is all about fighting the bad guys and saving the world • Action packed game with unique gameplay mechanics • Challenging puzzle-like gameplay • Non-linear story plot Packed with so much traveling that you'll wonder why anyone ever uses trains, Trains of the Aurora is a great time

In HoverRace, you can choose from four different hovercraft types; Cruiser, Skiff, Night Fighter, and Hot Rod. Each one has different advantages and disadvantages. For example, the Cruiser hovercraft has the highest max speed and is the safest; while the Skiff hovercraft has the highest speed but is more likely to crash. Gauge your racing skills against the best players in the world on the Internet. Use your mouse to turn your hovercraft left and right, and use the "Z" key to blast away your opponents. And stay alert, because you might find yourself on the other side of the map when you least expect it. Battle with other players from around the world or a local player in a 3D ring arena. Players begin at a starting position and can use power up to boost their hovercraft. Power up provides a very short boost which lasts a short period of time. The game can be played in vs, game, and team modes. Play with your friends via the in-game chat, or within the Internet Meeting Room (IMR) where you can race and chat with other players. Fly your cool hovercraft through the air, land, and seek out your enemies by zooming in on your enemies. You'll race against other opponents in a 3D ring arena. The game includes pick ups that allow you to explore a full course online in no time. Your hovercraft is destroyed when it comes into contact with other hovercrafts or walls. Fend off your opponents to reach the finish line. Land on another hovercraft to perform wild aerial maneuvers. If you run into a wall, you'll automatically die. ## **What's new in DOA6 Gust Mashup - Mila Amp; Elie:**

**, Steampunk Christmas There are decorations everywhere, Christmas, Halloween, Winter Solstice, but I don't know when that first appeared. All we have is bits and pieces; some from nature, some from an ancient source, some from a modern source. All made by people who has set their minds on creating and enhancing. Pots of candles, baubles, lighting, tinsel, all the trappings. I like potted holly bushes, fire trees, mistletoes, stars, willows, holly, mums and apples, pine. I lay there, on the windowsill gazing out at the night sky seeing and hearing the birds. They sing, the wind blows, and feathers fall from the sky. Santa Claus has not been the centre of Christmas celebration here in Oxfordshire. The celebration of the Jule-Hari, Chinese New Year. The celebration of the Winter Solstice, and the Midwinter Feast. The elements of the celebration are what we have, but we make our way with joy, and thanks for all the blessings. It's just the decoration of the house that reflects our grief and sorrow. So Steve's first attempt at a Martian (yes that's what I'm talking about!) blog coincided with our poor dear Deb leaving us this year for heaven and she'll appear every night in Steve's blog, along with other loved and lost. It was getting to be a bit of a thing, so to stop the melancholia, and keep the blog somewhat grounded I am going to have one of myself; and just throw in a few details, mixed in with the other blogging Martians. My favourites are going to be occasional chimes of the other interesting Martians. My task this week was to decorate our Christmas tree in the largest of my pots. I had purchased two holly bushes, (thought they were poinsettias) but it turned out they were alchemilla, and they were so beautiful. Their leaves twist and curl up as if they're writhing and still rooting themselves in the earth. I also purchased a handful of dahlias. They must have been very strong seeds, because even on the first night they were all about 6 inches tall, but I failed to cover them with a net! So I had to use buxus twigs. Then when they were all about 6 inches tall, and fruiting, I pulled them back**
