The most popular version of Photoshop is Photoshop CS5 Extended, a version of Photoshop where you can save your file in both Photoshop and Photoshop Elements. The very first version of Photoshop, released in 1990, does not support layers. Instead, it uses bitmap files. Adobe still lists Photoshop CS1 and CS2 as being available, but in reality these two versions have been discontinued. It is unclear whether they are no longer available for download or whether they will still be sold by the end of 2009. The first version of Photoshop enabled users to save layers into Photoshop files. However, the first Photoshop version that allowed layers was CS1. Adobe Photoshop 5 could be considered the first multi-platform version of Photoshop. It was designed to run on Windows, OS X, and Linux. Images can be manipulated in various ways in the Adobe Creative Suite 3 products Photoshop, Dreamweaver, and InDesign, for example. It can be used to create, edit, organize, and print documents. The first version of Photoshop with a WYSIWYG editing environment was Photoshop

CS4, in which layers could be edited and moved, and combined on a single canvas. Adobe first released Photoshop Elements, a version of Photoshop without the more advanced features of the parent product, in 2005. It is for amateurs and professionals who don't want to pay the price for Photoshop. In Photoshop CS5, the first version to allow layers to be edited on a single canvas, the new version introduced a Layer Styles that allows to apply common image editing effects to individual layers. Several free tools are available that turn images into Photoshop files. They tend to be basic and don't include all of Photoshop's features. The order that Photoshop CS4 introduced new features is shown below: It allowed users to create multi-image documents that could be opened from within Photoshop. The new version also introduced Smart Objects that helps it combine images into one shape. In Photoshop CS5, the layer system was moved to Photoshop's Layers panel. New tools for layers help add and remove layers. The new version allows users to edit the layers of an image. Adobe Illustrator is one of the leading image editing tools, but it has a number of limitations that prevent it from being as popular as Photoshop. In 2013, Adobe gave the three products a major facelift with the release of Photoshop CC, Dreamweaver

Q: Filter date less then today in Rails 3.2 I'm having an issue with Rails date filters. I'm trying to set the user's password to expire in 7 days. `User.find_by_password('password').try(:reset_password_token)` When I try the above code in rake, I receive the following error: `undefined method `try' for # (NoMethodError)` Does anyone know how I can filter my users on their password expiry date? If there is a way to do this in the controller, that is also acceptable.

A: Try this: `User.where("PASSWORD = 'password' and DATE('password') 'password', :created_at=>'2011-04-29')`

A: You can create new method for password and let it return record by interval on `created_at` field.

```
class User
  def self.expire(interval)
    User.where(:password=>'password', :created_at=>DateTime.now - interval.days)
  end
end
```

Three dimensional studies of the orientation of fibrillar inclusions in normal mammalian brain and in animal models of prion diseases. In this study, we aimed to elucidate the three dimensional organization of the fibrillar plaques (F.Ps) in normal human brain, those in three different mammalian species: sheep, goat and pig, as well as those in transgenic mouse and Syrian hamster brains. The brains were sectioned in the coronal plane for indirect immunofluorescence and confocal microscopy (Zeiss LSM510). We demonstrated that F.Ps had a nonrandom three dimensional organization with multiple clusters and aggregates being randomly arranged throughout the brain. In the central nervous system of all animals studied, F.Ps were mainly observed in the cerebral

hemispheres, with the exception of the cerebellum, and were mostly encountered in the subcortical regions, mainly in the anterior and posterior limbic systems, nucleus basalis of Meynert, parafascicular nucleus and mammillary bodies. The distribution of F.P clusters was similar among the three species examined. Three dimensional examination of F

BMW M6 GT2 wins Liqui-Moly Bathurst 12 Hour The BMW M6 GT2 has taken the 2012 Liqui-Moly Bathurst 12 Hour title and its creators to level four in the Bathurst Best Team Performance series. Ganassi Racing is celebrating another success as the team has claimed the Liqui-Moly Bathurst 12 Hour. The BMW M6 GT2, driven by the trio of Patrick Lindsey, James Rossiter and Philipp Eng, claimed outright and overall victory over the field in its first race at Mount Panorama, having triumphed in the first two races of the Liqui-Moly Bathurst 12 Hour. The Ganassi team dominated the race from start to finish with its new-generation BMW M6 GT2, which spent much of the weekend at the top of the timesheets. Crew chief Ricardo and engineer Danny Davis, who made their debut at the V8 Supercars and Bathurst 1000 races at the end of 2010, engineered the car to an excellent victory. The team reported for the race with a 37-point advantage and was immediately set to work with a simple objective – to pull away from its field. Led by Patrick, the team drove at the front from the front of the field all the way to the chequered flag, leaving the opposition in its wake. James and Philipp’s three-way battle was an

important element of the victory and they had just six hours to drive. The BMW M6 GT2 team is delighted with its emphatic victory. As Patrick Lindsey said afterwards: “It was our first run at Mount Panorama and I’ve never driven anything so fast, so it felt special.” James added: “I’ve never driven at Mount Panorama in these cars before. It was so good to drive, everyone was so fast and it felt really great.” Philipp stated: “I’m happy for us, for the team, for Ganassi and for BMW Motorsport. It was the first race in Australia for us and it was a good race. I think the BMW M6 GT2 was just too good today.” The team will now prepare for its next race, the Liqui-Moly Bathurst 12 Hour at February 11-12.
