New Movements FIFA Soccer is the most demanding soccer simulation video game on the market. It is designed to allow players to dive, slide, and even fake a move, but simulations cannot truly replicate the way a real human body moves. Motion data collected during the real match was used to help develop a range of new gameplay features to help the player "feel" more like they're a part of the match. New Player Traits A new "Player Attribute" system was introduced in FIFA 20 and is now improved in FIFA 22. With more than 20 new game modes, the attributes of the athletes can now be adjusted in game using the Attribute Templates. This means players can be fitted with abilities which are mapped to the "feel" of a game. Adding more flexibility to attributes gives the player more control on their game. New Senses FIFA 22 adds another layer of realism with new senses, such as Electronic Drift, Audio Decisioning and Maneuvering. In EA SPORTS FIFA, the players' brain anticipates what is going to happen next. We can't feel that with the videogame, but we can see it with the sight of a player's Electronic Drift. Electronic Drift allows players to be in game without sacrificing the rewards of being an actual soccer player. More effective communication FIFA 22 introduces a new way of communicating with teammates - the Squad UI. Squad UI allows for a stronger communication between teammates and management of the team. Players can see important data at a glance, and communicate important information to the rest of the team. New Difficulty Settings New Goalkeepers Goalkeepers continue to be a critical part of the FIFA team with added movement and attacking skills. Champions League Champions League Mode was revamped to feature Real Madrid in the Champions League, after being a feature exclusive to Pro Clubs in FIFA 20. National team-based competitions are also being improved. La Liga The "La Liga Season" mode was improved to offer more depth and realism, and includes elements from both the Premier League and other European leagues. The default "Real Madrid vs Barcelona" match type now creates a higher level of difficulty. Champions League The Champions League mode was improved to offer more

Features Key:

- The World is Your Stage, literally. FIFA 22 features the most immersive and expansive game environments and stadiums yet. FIFA 22 provides the ultimate soccer experience with over 800 real-life stars and more than 700 player abilities, ball physics, lighting, weather, a new Crowd Engine, and dynamic context-sensitive ball responses.
- Dynamic Aerial Scouting. Scouts no longer rely on the AI to predict and analyze the position of the ball. Instead, they are able to fly where the ball is going to be in real-time, no longer relying on statistics to dictate whether a shot has the potential to go for the whole goal.
- New Tactics, for all sides. The new tactics feature offers numerous interesting new tactical possibilities. They provide a completely new combination of formations and line-ups for each team. These unique formations are taken into account as well, for the first time, when picking your team.
- A Newball Physics System. FIFA 22 features more realistic ball behavior, authentic touches and aerial duels. The experience of the new ball physics system will change the way you play and the way your opponents counter. For the first time ever, never have the air of the ball changed shape after being kicked.
- Pro Player Data Sync. Create your player 2.0. All the new player data is automatically synced to FIFA Ultimate Team in real time. The momentum you earn with play in Ultimate Team is used to make your character more dynamic in FIFA.
- Victory Parkour. Once a player enters the "skillpark", he enters a new level of play that is tightly integrated with your movement. The physics engine picks up every movement, runs with it as an actual movement, and even helps you position yourself to that movement.
- New Variations. Motivation unlocks through playing. The new player traits reflect a universal emotion that has a direct, positive effect on both your team and your overall gameplay. Conditioning, studying at the college, taking a break and preparing a plan are just some of the many activities a player can undertake while attempting to improve his skills or fitness.
- Unlocked Pro Skills. Pro Skills have been fully unlocked from the player's position to provide more freedom to play, and reflect a higher actual score progression.
- Xbox One X Enhanced. FIFA 22 will be the first title to take advantage of Xbox One X Enhanced features and delivers players a stunning new visual experience

this list CommentsYes I am definitely going to be there and most likely going to ride for the most part of the show. I just wanted to share my plan as I am trying to organize this trip. I live in the St. Louis area and ride around St. Louis but would also like to do a loop ride around the greater St. Louis area. I would like to ask who else will be there and how many. I know it can bc9d6d6daa
