Here you can download all types of drivers for laptop and printers for all letest configuration.. 8.15.10.2778, Vendor: Intel. Supported OS: Windows 10 32 bit, Windows 8.1 32bit, Windows 7 32bit, Windows Vista 32bit. Network & Wireless Drivers .Q: SMB2 file access on Windows and Mac I need to ensure two hosts can access the same SMB 2 file-based directory. On Windows I'm using Microsoft's Windows Server 2000 MTAurora application from For Mac OS I've been testing with Apple's built-in MacFUSE. While I'm relatively new to SMB2, I've been able to setup a share with far fewer problems. It's not an enterprise solution, but I would like to have this in place for the time being. It's also more functional. I'm currently unable to share the SMB 2 directory on Windows and Mac. Is there a way to do this? What configuration information would be needed to accomplish this? A: The two hosts need to have roughly the same version of SMB2 or a server that supports it in order to share the same SMB2 directory. The Mac client will read and write the SMB 2.0 server by default. Windows servers running the older SMB1 protocol must be manually configured to support SMB2. See Microsoft's technet article on version restrictions: 2); test_form_attrs.height = h; test_form_attrs.width = w; test_form_attrs.position = 'absolute'; test_form_attrs.style = 'display: none; left: -2000px; top: -2000px;'; document.getElementById('test_form').removeAttribute('onsubmit'); document.getElementById('test_form').appendChild(test_form_attrs); } function stopTest() { clearTimeout(setTimeoutFn); running = false;
