* **Photoshop Elements** (discussed in the next section): This free program enables you to create, edit, and enhance images of any kind. Use it to create, edit, and process simple and complex images. Images can be edited in many ways. You can cut, copy, and paste portions of other images onto your own image, add text, and even print them. But here's where it gets interesting: You can apply that same text to different elements in different parts of the image. * **InDesign:** Adobe's page layout application lets you create professional-looking print pages, brochures, and even CDs and DVDs. With the help of other tools, you can get the job done with InDesign (the article on page 202 explains how to use InDesign to layout pages). You can also take advantage of the powerful visual features available with Adobe InDesign's switcher and multilayer tools to create beautiful images and layouts. * **Illustrator:** Adobe Illustrator creates professional-quality vector graphics such as logos, line art, and illustrations. It is a good solution for designing corporate Web graphics and logos, creating cover designs for magazines and books, and even making graphic designs for advertising campaigns. Illustrator's powerful shapes and capabilities give you the ability to easily create 3D objects. * **Flash:** Adobe Flash is a multimedia platform that enables you to embed multimedia content (such as videos and photos) into websites, Web pages, and online applications. You can also create PowerPoint presentations and publish photos to online news sites, like Flickr (www.flickr.com). With Flash you can produce rich animation, and manipulate images, video, sound, and text. ## Applying Creative Options You don't have to know everything about Photoshop to be a proficient user. You can make the majority of what you need to do for your hobby or commercial photography using the basic tools and features in Photoshop.

Photoshop is the most popular image editing program in the world and is used by everyone from designers to photographers to students to random people on social media. Why? Partly because of it's ease of use, but also because it has a massive range of features. However, even with Photoshop's huge library of features, you might sometimes wish it had a few extra. For those of you looking for alternatives to Photoshop, you might be looking to use a feature-rich photo editing software or graphics editor, whilst perhaps at the same time being somewhat more specific to your needs. You may have a specific interest in using it to retouch images, for example, and a photo editing app on your phone just isn't going to cut it. Or you could just want a suite of graphic editing tools to work on a large selection of images, to create new content for yourself, or even to teach others about graphic design or illustration. The point is that Photoshop is one of the most popular image editing programs in the world, and it's popularity stems both from its feature set, but also it's ability to import and work with a huge range of media formats. But what if you want to use a completely different format? If you have a photographic background, you might know that it can sometimes be better to start a creative project with a black and white photo, for example. And you may want to create a more realistic look for your design projects, which might suit the editing tools you want to use better. Either way, we're going to take a look at 12 completely different photo editing and graphic design programs. Different types of photo editing software Photo editing software is split up into two main categories: Single-purpose photo editing software Non-single purpose photo editing software Single purpose photo editing software Photoshop would be the obvious example of this type of photo editing software as it is used for a variety of different projects. Most of these are very simple programs, designed to do one specific thing and no more. These types of programs are often best when you have a specific aim in mind. That said, even if you don't have a specific project in mind, they are great for exploring new possibilities and sparking the creative spark. And, depending on the software, they may have a lot of other features and a681f4349e

Backgrounds allow you to block sections of a background and add transparent areas that will be seen through the background. Bitmaps are simple graphic images that can be imported, edited and exported individually. They are highly compatible and supported by most Photoshop products. Blur filters simulate the natural blurring effects of the human eye when viewing an image. Blur effects create a soft focus. Brush tool allows you to paint areas of an image or its specific areas. Bump Map gives you a realistic look to your mesh models by adding variation in pixels. Color Picker allows you to select colors from a range and apply them to certain objects. The Color Picker also works in layers. Crop Tool allows you to grab rectangular areas of an image for further editing. Curves allows you to modify a selected area of an image to achieve desired effects. Custom Colors allows you to change colors in an image to create a unique and fresh look. Deep Shadow & Light allows you to overlay one layer on top of another. This could be used for creating a gradient. Different filters can be applied to an image by using the Filter menu. Filters are used to make the image look sharper or smoother. Dodge & Burn Effect creates a soft, blended effect in a chosen area of an image. Dodge & Burn filters simulate the effect of fire on the edges of an image. Dodge & Burn filters are quite useful in making the edges of any image look more interesting. Drop Shadow allows you to create an illusion of depth in an image, or even simulate a reflection. Draw & Erase Tool allows you to easily erase unwanted objects in an image. Duplicate layer allows you to duplicate an object. The duplicate layer contains a mirror image, which is different from the original layer. Edge Effects allows you to add different visual effects to an image. Effects filters add special effects to an image. Effect > Desaturate converts the color in an image to black and white. New Delhi (CNN) -- The families of five Indians who were killed in a bus accident on an outer road in northern Thailand have filed a compensation suit against the bus operator, the Thai police, or both, according to officials with the families and the bus company. The crash killed the five Indians and a Cambodian woman who were traveling to a wedding in the tourist town of Chiang Rai, the provincial capital of Chiang Mai, according to Watthanaya Urung, executive director of Tour Support Association, an organization that represents tour operators. "It was a terrible accident," Urung said. "We are not accusing anyone of wrongdoing, but we are thinking that the police, since they're responsible for the roads, should have a greater responsibility, and they should have been more careful." The accident happened at about 6 a.m. local time on Monday, when a bus carrying the 21-person group stopped on the outer road and was hit by an oncoming bus, he said. The cause of the collision was not immediately clear, but both drivers were killed, he said. The bus the group was traveling in was owned by TURTAN Tours, an Indian travel company with about 100 travel agents around the world. It had been chartered by a taxi service, but had not been hired by or paid to the taxi service, Urung said. The firm had gone bankrupt two years ago, but in the aftermath of the crash, the families have filed a compensation suit "so the group can be compensated for their expenses," he said. TURTAN Tours, he said, initially told the families of the dead that the occupants of the small bus were high school students who were on a school trip. "It was just their interpretation of that," Urung said. "It was very difficult for them to believe." However, the firms that hired buses for the group has told CNN that the dead were not students, but, he said, "that they took the buses for pleasure, not from school." The bus company has also sent a message to the families saying that they were not responsible for the accident. "The bus company definitely wants the families to get the compensation money," Urung said. TURTAN Tours could not be reached for comment.Q: Custom entity not mapped to the NHibernate session I'm facing a problem in my current project. I need to create
