This promotional code cannot be redeemed again. I agree to receive marketing emails from Fusion I understand that I can opt-out at any time. I also agree to the Privacy Policy and Terms of Use. At the end of the day, you can't really hurt a company with a great reputation. No matter how bad of a product you have. If you had a 90 day return policy, people might say you are a scam-ware. Reviewers lose interest once they have found a plugin that works for them. Thanks, was looking for some alternatives for nuke and this one is pretty easy to install and use. Actually i like this one more, because you can choose your own files and then direct your renderings to an external location (HDD or external SSD). I agree to receive marketing emails from Fusion I understand that I can opt-out at any time. I also agree to the Privacy Policy and Terms of Use. I will definitely check out their other products for nuke as well! Thanks, was looking for some alternatives for nuke and this one is pretty easy to install and use. Actually i like this one more, because you can choose your own files and then direct your renderings to an external location (HDD or external SSD d0c515b9f4

Vray for Revit can be used with Autodesk Revit R15 via ZapWorks; best choice for both Revit 2021 developers and users. Ideal for those who want to try online rendering in Revit without any hassle. What is V-Ray for Revit? V-Ray for Revit is a free full-featured render plugin that can be used to render various objects in Revit. You can find more information in the documentation. Installation Download Vray for Revit and extract the downloaded archive. Run the setup program and select the Install V-Ray for Revit option. After installation, you can launch Vray for Revit and you will be prompted to select a location where to store the plugin's database. After the installation, you must update the plugin's database. To do so, open the 'Options' menu from the Vray for Revit icon in the Revit menu bar, and select 'Update database'. Check your internet connection, as the update is quite big and may take a long time. After the database update, you can launch V-Ray for Revit. Change V-Ray for Revit configuration After the installation of V-Ray

for Revit, you may need to reconfigure the plugin's settings. In the 'Options' menu from the Revit icon in the Revit menu bar, select 'V-Ray for Revit'. In the 'Options' dialog that opens, change the following options: Select 'CPU' from the list in 'CPU options' and click on the 'Change' button. Check the option 'Use GPU' and click on the 'Change' button. Check the 'Provide path to an existing plug-in database' option and click on the 'Change' button. Select the location where you have stored the plugin's database, such as : \Program Files\Vray for Revit\Plug-ins\Database. Vray for Revit is now running. Exporting .glb files You may export .glb files from Revit using the following procedure. In the 'File' menu, select 'Export' and then select 'binary models'. Click on the 'Files to export' dialog and select 'Render Settings.xml.glb'. In the 'Export.glb file' dialog that opens, select 'Render Settings'.
