Outside of AutoCAD Autodesk also offers more general productivity and custom software. An Autodesk subscription grants access to software designed by Autodesk. All subscriptions offer access to AutoCAD, a Graphic User Interface (GUI) design program, a 3D modeling program called Architecture Design, a 2D drafting program called VectorWorks, and other productivity applications. Other software can be purchased directly from Autodesk. The latest version of AutoCAD has an API. In January 2013, the

company released its cloud-based cloud software product Autodesk Anywhere, as an alternative to AutoCAD. Designation as a Registered Trademark Autodesk owns the exclusive right to the name AutoCAD. An annual report by the company states that the name and logo of the program is not registered as a trademark with the United States Patent and Trademark Office (USPTO), but that "Autodesk has a trademark license agreement with its customers who are licensed to use Autodesk software that includes the words 'AutoCAD' or 'AutoCAD' in its product name." The existence of the license agreement is also referenced in the Autodesk's annual report for the calendar year 2007. The USPTO has allowed "AutoCAD" to be used as a genericized trademark and does not require registration with the USPTO for that purpose. It has rejected a registration for "Autodesk AutoCAD" and for "AutoCAD" as individual words in a product name, though the USPTO has allowed the registration of "Auto CAD" as a graphic symbol for designating software as "automated drawing" in class 134, for use as a trademark for computer software. Linux support Autodesk uses Wine as the default cross-platform compatibility layer to allow Windows applications to be run on Linux, but does not maintain porting of Wine to new versions of Windows. In 2013, Autodesk released AutoCAD 2012 for Linux in the Autodesk AppCenter. It is available for Windows and Linux, and can work with both 32-bit and 64-bit versions of the Linux kernel. Versions There are many ways to keep up to date with new releases. The Free Autodesk software includes updater service, which automatically checks for updates, and sends users notices when updates are available. Autodesk also offers free Software Assurance (SA), which is a yearly subscription license ca3bfb1094
