The Sawtooth and Blur Brush are useful for heavy blurring or adding scratches and other textures. The Paint Bucket allows you to grab color from one area of an image, and paint it into another area. This is great for adding color to an image, and for adding color to an image that is difficult to color, such as a tree in a desert scene. The Eraser brush erases details or small portions of an image. It is useful for removing details from an image. The Smudge Brush warps images, adding or removing color to an image. You can also use it to add scratches to images. The Pen tool can be used to draw directly into the image, adding textures and colors. The Gradient tool uses a curve to define a shade of color that is applied to the image along a range of values. For instance, you can use this tool to quickly change the color of an image. The Eraser is a powerful brush. You can use it to erase sections of an image. Sometimes you'll want to use multiple erasers to erase objects from a single image.
