The concept for the Elden Ring was born in the fantasy world of fantasy literature. The story of the Lands Between is a creation of an imaginary world. A new world that is born from the world of fantasy literature, one that is full of monsters and danger and the world of fantasy literature, the world of fantasy literature where monsters exist, the world where you can fight and your enemies will disappear. The world of the Lands Between is a world with an endless story and a natural world where life and death coincide. Adventurers climb alpine peaks and monsters lurk in the darkness of caverns. Forest, desert and fields appear on the map. That is the world of fantasy literature and the world of fantasy literature created by the Elden Ring. ◆ Art Style The Elden Ring game is a fantasy story crafted with a realistic art style. The art will draw you into the fantasy realm of the Lands Between. The structure and design of the game will be unified by the traditional art style of the fantasy world of fantasy literature. ◆ Combat System In the game, combat is a key element in exploring the world. Every item and game mode can be used to attack and defend
