

DECTalk Access32 V4.6 (speech Engine) Download PATCHED Pc

DECTalk[4] was a speech synthesizer and developed text-to-speech technology...whose source filtering algorithm was variously known. like KlattTalk or MITalk.[5][6] Ultimately, it was used to form the voice of an announcer in motion pictures, commercials, and music.[7] Unlike later speech synthesizers, Dectalk was a speech synthesis synthesizer designed to be able to "speak" English and its dialects without distorting it.It was one of the first technologies to offer human-like audio quality, albeit in terms of technology, rather than the quality that was later achieved with Dante.[8]
