In addition to the Update Center, you can use Photoshop's Task Panel to manage the updates to your installation. You can create your own custom panel and add to or remove items that you want to see on the fly. We've also noticed that many customers

are using Lightroom on Windows and the companion Lightroom Mobile app, on iOS. That means there's now a Task Panel that can be used by those platforms. In our usability tests, when we asked users about the most frequently used feature, the one they told us over the past few months was the New Adjustment panel option, for creating a new darkening or lightening a curve. We're excited to bring the same option to the Curves tool in the next release.
