Aloaha PDF Saver

Aloaha PDF Saver is a program which enables you to fill PDF forms and to save them to your computer. It can be used by individuals of any level of experience. This type of software is necessary when you want to protect the authenticity of your PDF files and to prevent them from being commercialized by unauthorized users, for instance. The interface of the application is minimalistic and intuitive. Opening a file can be done by using either the file browser or 'drag and drop' method. So, you can apply a picture or text signature, configure digital signature settings, as well as enable transparency mode and certify the document. It is possible to create templates. In addition, you can toggle between Adobe and Aloaha viewing mode, adjust the DPI, switch to best size viewing mode and enable a toolbar. Plus, you can disable borders and change the interface language. When you finish editing the document, you can save it to a new file by establishing the output filename and directory. The straightforward software solution runs on a moderate-to-high amount of CPU and system memory, is pretty responsive to commands, and includes user documentation. Aloaha PDF Saver did not freeze or crash during our evaluation. On the downside, it popped up several errors whenever we opened a new document. Other than that, Aloaha PDF Saver provides some basic features for applying digital signatures to PDF files. Jot Notifications Pro 1.2 MB IEEE \$24.95 Copy protection: Unlimited users Copy protection: Unlimited users Free download from These Soft's licenses will expire, at the end of the free-trial period, even if the trial remains active.
