friends, co-workers or customers, as well as compose personalized notes for each contact. Set up your own database and populate it with contacts It's wrapped in well-organized and clean interface divided into a tree structure on the left side of the panel to which you can 2edc1e01e8

You can now bring your address book into the 21st century with Delicious Address Book. It's a powerful, personal-organization address book that has all your contacts stored in one app. The app is packed with powerful features that can help you sort and organize addresses into categories. With Delicious Address Book, you can sort contacts based on their type and location. Just select a category and you'll instantly see all addresses linked to that category in a simple, clean design. Use your phone's camera to snap a photo of someone's business card or a picture of a physical address. Then, paste the address directly into the Delicious Address Book and use your phone's handwriting recognition to add the contact's details. You can easily transfer all the contacts that you have added into your phone's address book. The built-in editor makes it easy to edit and modify any text you have pasted. If you have an existing database in your address book, you can easily import it to Delicious Address Book. The app automatically sorts your contacts

into categories based on the contact's type. You can also sort contacts based on their current location or their birthday. To personalize your contacts, you can assign notes to each contact. As a result, your addresses will have a personality. All contacts are synchronized with your Google account. The Delicious Address Book application is free, but it includes optional in-app purchases. Advantages Disadvantages Sometimes, the simplest solutions are the best ones. Living in the age of technological advancement has benefited all of us and we should take advantage of what the next generation has to offer. While the idea of a universal address book may sound a bit strange to some, it is not the only way to organize all of your contacts. Google is not your only option. Let's say you want to save time and do everything you can to keep a personal or business address book up-to-date. Being a savvy user, you know that not all smartphones are the same. Not all operating systems come with built-in address books, and if they do, they may not be useful at all. Therefore, you need a program that allows you to sync all your contacts and be

available regardless of the operating system or the software you are using. With GooTools, you can manage your personal and business contacts from all over the world. In addition to all the standard functions such as adding contacts, sending texts and making appointments, this app also has a convenient way to organize your address book. So,
