There's a new "Rotate" command that lets you rotate for printing, which is helpful for combined photos in a multipage layout. There's also a new "Transparency" command for manipulating an image while leaving the other slides you're using in the PSD unchanged. The Clean-Up command gives you a number of options including a new Cutout, Trim and Erase commands that let you make both rectangular and circular cuts, trim a mat or ellipse from an image and erase background or other unwanted areas. "Underdraw", a new feature, lets you create a vector outline to match any shape you draw on the canvas. Once you're satisfied that you've achieved the desired shape, just delete the original image, leaving the underdefined reflective illustration as it is. This is a great feature that basically turns any scratch pad into an image editing tool. If you prefer "Underdraw" to "Outline", you can click on the menubar, "View", "Outline" or the "Zoom" tool options and grab and drag off each shape individually -- take it easy as you won't notice the shape as you remove it from your document. As stated before, these new features were achieved through the Cloud. Adobe previously only offered a monthly subscription if you wanted to edit on the web. With Lightroom 5, you can now sign up for a six-month subscription that gives editing and sharing features without the need to create an online account or sign up for a new subscription each month.
