## What's New In GnaqPlayer?

GnaqPlayer is a simple and lightweight player for playing music, podcasts, audiobooks, and many other audio and video files. It supports playlists as well as drag-and-drop. Supported playlist formats are: M3U, M3U8, ASX, AAC, MP4, AVI, MP3, OGG, FLAC, MOD, IT, S3D, WMV, ASF, XM. Audio and video files can be dragged from a folder onto GnaqPlayer's playlist. Playlist files can be created manually. GnaqPlayer supports multi-line display. Playback controls are accessible from the main menu or from the status bar. A number of features: radio stations, random playing, repeat, shuffle, play as background, batch conversion, unicode support, support for custom player and skins. Supports several image formats: GIF, JPG, BMP, PNG, ICO, PCX, PSD, EPS. Also supports font types: WOFF2, TTF, EOT, OTF, and SVG. The application can be moved anywhere on your desktop and never removed. Note: The trial version of this program can be used only once. Description: Escape is a music player that supports music files of all kind of format (MP3, OGG, FLAC, AAC, etc.), and can manage playlists with a maximum of 250 tracks and 7 genres. Moreover, the player can be positioned at the top, center or bottom of the screen (for such a positioning it uses the sticky area at the bottom of the screen) and it can be resized to almost any size. Escape also has an option to display the filename in the statusbar. Finally, if you want to see the play-count of each track, you will find that number in the statusbar. Also, if you like this application, please, rate it in the Android Market. Even if there are a lot of better players in the market, my opinion is that everyone should try Escape for their own taste. The developer of this app is a fan of the freeware genre and this makes this music player particularly different. Features: • It is possible to manage your playlist manually or with playlists using a M3U playlist file. • It is

possible to sort your list by the columns < Artist >, < Album >, < Title >, < Genre > and < Play-count >. • You can also insert a comment on a specific track, using a list of predefined templates. • It is possible to play the files in all kind of format (MP3, OGG, FLAC, AAC, etc.). • The statusbar shows you the length of the track and the artist. It also shows the total number of songs played. • You can also
