ScreenHunter Plus

Do you want to be able to capture screenshots from any application and save them to various image formats? In that case, ScreenHunter Plus is your solution. As ScreenHunter Plus is able to capture screenshots from most popular Windows applications including Adobe Photoshop, Apple Aperture, Apple iMovie, Apple QuickTime, Apple iDVD, Apple iPhoto, Apple iTunes, Apple iTunes U, Adobe Reader, Adobe Flash Player, Mozilla Firefox, Opera, and Microsoft Word, it has become very popular. Now there is a version that lets you choose the area you want to capture. You can capture the active window, any application in fullscreen or any other picture of your choice. Additional features include the ability to capture any selected region and you can add text, transparency and a number of other customizations to the screenshots you capture. Click on the small arrows at the top right corner to adjust the default settings. Description: SoftArt Photo Studio is an application designed to turn photos into art that can be used in greeting cards, web pages, posters, slideshows, newsletters, and reports. It works with JPEG and PSD image files and lets you manipulate color, add borders, gradients, and text, or perform some special effects such as patterns, frames, transparency, etc. The application can be used as a standalone program or it can be used as a Photoshop plug-in. It also includes an extensive range of filters that can be applied to any image. You can adjust the contrast, the image highlights, the shadows, the whites, and the blacks. You can sharpen and soften images, add color accents and adjust the brightness, and apply different filters. You can also crop images to a specific size, rotate them, resize them, and apply various overlays and effects to them. You can further enhance the images with special effects such as posterization, panoramas, and vignettes. Description: Photo Grid allows you to define different areas in an image and then automatically generates beautiful, dynamic, photo albums containing those areas. Simply drag an area onto an image and Photo Grid will intelligently place the rest of the image into a gallery with seamless transitions. Photo Grid works with any image, whether it's a photo or a graphic. You don't have to have a photo editing program, such as Adobe Photoshop, to use this tool. Description: AirCam Monitor is a simple app that allows you to remotely monitor your home or office
