and QuickTime, and the format of AVI, MPEG-4 and MP3
is fully compatible with Windows Media Player and
QuickTime.

Secam

KEYMACRO can help you generate passwords and PIN
numbers, while using only the keyboard. Its convenient
and extremely efficient utility allows you to set a long
random passcode by using both numeric and alphabetic
characters. Using these alphanumeric characters, the
program will not only create a string of numerical digits,
but also a string of letters. This way you can easily add
the letter X to your string. The program is based on a
random generator that can produce a truly random code.
Moreover, you can configure different auto-fill patterns to
prevent easy guesswork and help you enter an
alphanumeric string in a short time. The application
supports both English and Spanish languages.

KEYMACRO Features: - create a random string of digits, letters, and special characters - auto-fill options to simplify entry of alphanumeric data - view the string in a variety of ways to simplify the process of entering it - run in the background - edit the generated string of characters, including adding additional characters - multiple languages - use different auto-fill patterns - supports various keyboard layouts, including US/CAN/AU, etc. - password strength indicator - timer for expiration - portable versions Please note that KeyMacro Editor application is built for viewing files on Mac OS X computer. The PoshTun Application is a VPN client that provides secure Internet connections. It uses highly-advanced Encryption Algorithm (AES-256) to encrypt all traffic between the device and the VPN server. The traffic encryption helps to hide your IP address and mask your online activity. Furthermore, the application can automatically detect network configuration, and adapt to changing environments to ensure smooth network connections. With PoshTun, you can use the Internet securely and anonymously, completely privacy. Features: - Use PoshTun to easily encrypt and decrypt VPN connections - Password generator is available - Real-time speed statistics and bandwidth usage indicators - Built-in Windows firewall to allow network connections - Copy/Move/Create/Delete files on the device - Change the network configuration automatically - No need to use any

other VPN client - Change the network configuration automatically - No need to use any other VPN client - Use PoshTun to easily encrypt and decrypt VPN connections - Password generator is available - Real-time speed statistics and bandwidth usage indicators - Built-in Windows firewall to allow network connections - Copy 2edc1e01e8

The KeyMacro extension is a small, but powerful utility that allows you to perform keystrokes on the web browser. The utility works with IE and Firefox and supports many command and modifiers. To use the extension just paste this script in the address bar:
`javascript:window.open('','toolbar=yes, location=no, directories=no, status=no, menubar=no, scrollbars=yes, resizable=yes, copyhistory=no, width=550, height=450');` (don't forget to change the address of the webpage). Note: There is a database of macros in use for different purposes.

Sticky Notes 3 Description: Sticky Notes is an application that allows you to quickly and easily create and edit notes on your computer desktop. You can use Sticky Notes to take notes on anything you find on your desktop, including web pages. Add new notes by double-clicking anywhere on the screen. You can choose from a variety of templates to quickly create notes.

Printing to PDF Description: Print to PDF is a handy program that allows you to convert any document to PDF format. With Print to PDF, you can quickly and easily print any document on your desktop. There is also a useful feature, which allows you to specify the number of copies you want to print.

S3Monitor: Description: S3Monitor is a handy and reliable application that facilitates access to a versatile service, which can record

and store streams from your webcam. Secam makes the perfect monitoring solution, allowing you to run it in hidden mode so that it's not easily detected. The recorded videos are stored online, but the possibility to save the recordings offline is also possible. Note: The application requires an account, which can be created only from within the program itself. KeyMacro:
