Music For Life Free

Music For Life is an easy-to-use app for music lovers. The interface is easy to understand, and navigation is done with the arrow keys or the menu buttons. It can be customized, and user can save songs for later listening. Category: Music, Multimedia App Name: Music For Life Developer: ABCsoft Entertainment Official Site: App Store: Google Play: Music is an important part of our lives, as we all love listening to our favorite songs that can lead us towards new levels of energy and motivation. Besides that, it can do wonders for our mind and soul as well, mending us with lyrics and musical hues. Music For Life is an application that brings us closer to our favorite tunes, serving us a bit of extra flavors in terms of features, while featuring a simple interface. Usability and ease of access The application presents itself as a lightweight music player, but with just enough functionality for listening to our favorite songs whenever we want. When you first access it, you can opt for listening to the tunes from a specific country, or language, that are available to be selected from the provided list. Interface and design The application has a slick design, and the elements are fairly well integrated within the menus. But one thing that could bother users is the way scrolling feels when you want to see what else is on the song list. It acts a bit lazy when you try to scroll down with the mouse wheel, and if you click and drag the scrollbar, it will act as it is inverted. So, at least for now, the only solution to move further down a big list of songs is to scroll patiently until you find what you want. Luckily, there is a search function that can help until the scrolling is improved. And speaking of useful features, we can access the song we are listening to on Youtube directly from the app's interface. To do that, you only need to click on the image of the current song that's playing and an overlay will come forward. Here, you can share the song on different platforms as well, but the most interesting feature from this menu is the button that will show you the song's lyrics, which is something great to have at your

This App has no permissions to access your location! ♫ Music For Life ♫ Music For Life - Your Music and Lyrics Music For Life - Your Music and Lyrics ♫ Give us your positive vote and leave your feedback ♫ This is awesome!!! This is the best thing I have seen in this app so far!!!!!! I use this app on my phone and my tablet. It is awesome!!! I love the music it is awesome!!! I just wish they did more of the country or country music and less rock. We do have country radio stations here but it is so limited. I also wish they would have a shuffle feature instead of playing all songs in order. Needs some more features The app is really awesome when it works. However, sometimes it doesn't, and you have to click the back button to get out of the app. All the songs that are not on the list still play in the app, and you have to unplug and replug your phone to shut it up. Also, we have the country and language option, and it often switches the music to a country other than the one I selected. Tried this, and it works for me I've been using this app for several months, and it works just fine for me. I would give it a 4 star rating, but it should offer me the option of hearing music in English, as well. I have an idea of how to get that to happen, but I haven't quite figured it out yet. Beautiful! This app is very good, but it should allow you to choose the language
