"In addition to powering the best creative workflows for millions of customers, Adobe on the web helps anyone create and share amazing experiences, regardless of their skill-set, whether they're working on a desktop, laptop or mobile device, in more ways than ever before." With the new update, Adobe also introduced the ability to embed video directly into your image. Photoshop now has many new video editing tools to help users edit and trim videos. Once you've done the editing, you can save your image and turn it into a layered file. Additionally, Adobe has added a Jumbo thumbnail option to the image editor, allowing you to create ultra-large images with a single click. The Jumbo option expands the canvas as you zoom in/out, where you can add other layers and transform your image into a masterpiece.
