The 720p, 1,280 x 720-pixel video can be streamed over a Wi-Fi or cellular connection. It's also available on the iPad's App Store for offline playback. Like other videos from Adobe, the free app includes help information and a library of content you can watch to understand the features being used in your work. Photoshop's primary goal is to let you clean up and automate your photos, which means that it should be easy to get good results in any kind of photo editing scenario. The program's free-for-starters edition can do just that, and those starting out might not want to shell out the money to purchase Photoshop Elements. If you can use the Auto-Adjustment feature, you'll end up with pretty decent results. Since the release of Photoshop Elements 10 in 2012, it's had a reputation for creating high-quality output. However, for the user who is interested in simply editing photos from a more basic standpoint—a task that has been fulfilled by a handful of image editors in the past but not always easily—Photoshop could make for an attractive addition to the workflow. Starting at \$79.99, this program could be a rival to Apple's Aperture. The fixed-price purchase includes all the available programs needed to compete with professional photo editing software like Photoshop and Lightroom. Adobe believes that photo editing is here to stay. The company must need Apple's Aperture to succeed. Aperture is so far out of touch with professional photographers that there might not be an audience any longer.

Brush variations for text is one of the most intriguing new additions to the software, bringing more control over the type of brush you use to stroke your text. For example, you can flick through any of the variations that stock the Brush palette and use that as a brush under the Artistic Features tab. This could well be the new tool that brings brush to a whole new level, provided Adobe provides updates to refine and improve on the palette. One of the coolest new features for 2019 is a feature called table paint. This enables you to paint to a table and work on the image from a new perspective. To do this whilst you're working on the image, all you need to do is press the Tab key and Table Paint will open from the menu bar. Key is a new tool that enables you to draw with any stroke on an image, letting you create contours to add lighting, for example. Finally, if you're doing your own watermark, you can now make it look like it's been stamped on the image. At the magazine level, Adobe has introduced tools to enable you to create a 3D gradient that's perfect for generating the content for a magazine cover. Additionally, there's a new facial recognition tool that matches facial features to create the perfect-looking avatar. For both Filter and Design Centre Pro, there's a new feature that allows you to view the front side of a print ad as a magazine page. You also now have the ability to generate the front and back covers for your print product. Given the possible new post-printing career, that's quite the feature.
